6. Photo Analysis: Of the 56 targets photographed, two were considered good, 34 as fair and the remaining 20 were rated poor on photo interpretability. Overall quality was fair with 5 percent cloud cover. Degradation can only be attributed to obliquity, haze and scattered clouds. The Film Evaluation Report submitted [redacted] rated the quality as good in all categories except exposure which was considered normal to slightly heavy.

7. Maintenance: Article 383 was flown on this mission. There were no aircraft general, engine or flight instrument malfunctions.
